

Amega Global: A Revolution in Wellness Care.

AMized® Fusion Technology

The human body is divided into 3 sections:

1. Energetic System
2. Information System
3. Physical System (Figure 1)

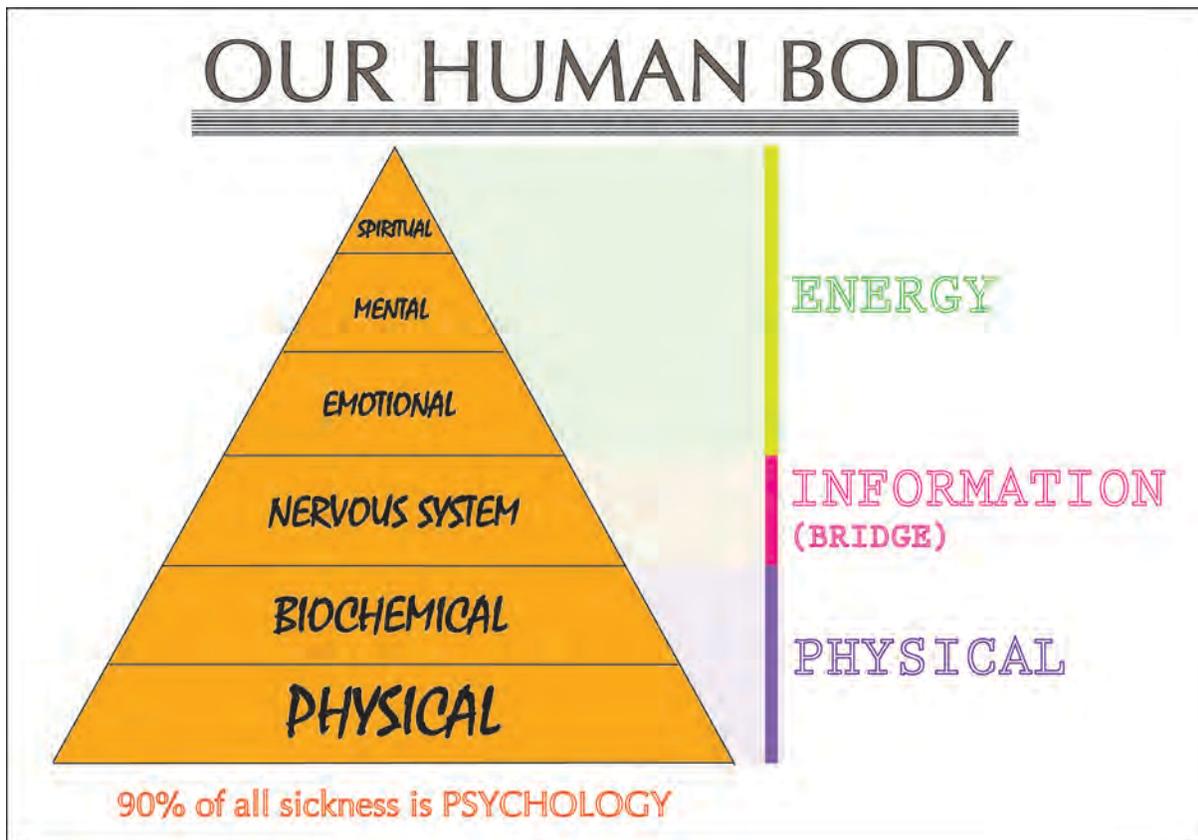

Figure 1. The human body can be divided into 3 broad areas : 'The Energetic', 'The Information Bridge' and 'The Physical'.

Pollution, parasites, radiation, e-smog and free-radicals distort the bio-energetic field (Energetic System). When the bio-photonic field is distorted, this brings about disturbance in the information system within the body, which in turn results in physical ailments.

AMized® Fusion Technology or AFT is Amega's proprietary technology. It was developed by the Amega Global R&D Team which is a multi-national body of scientists, doctors and physicists .

This technology was developed over a period of 15 years of research, applying the principles of Quantum Physics and Quantum Mechanics.

What is AFT?

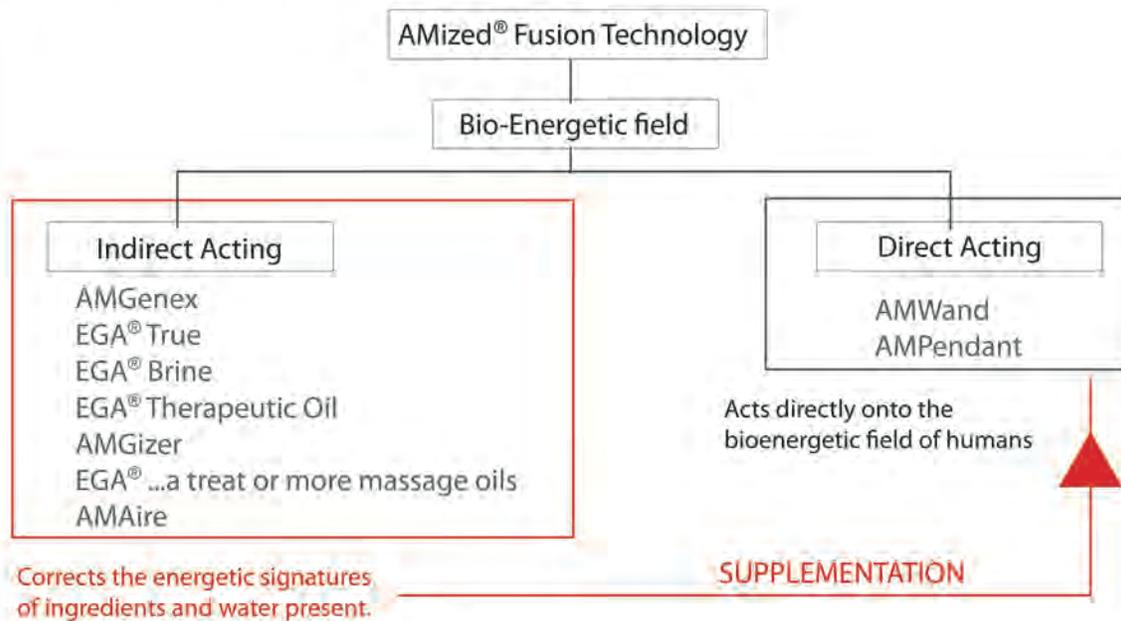

AMized® Fusion Technology is a proprietary process where any organic matter is energized to resonate at *Zero-Point Field*, the source of all life's creations. The energized items (eg: Pendants, Creams, Oil, etc.) restore the distortions in the body's bio-energetic field to bring about balance (homeostasis) **(Figure 2)**.

AMized® Fusion Technology

A Resonance Technology of the Future

21 days proprietary process that realigns the frequencies of each atom to its natural optimal frequency

AFT's role in AMEGA's Products

AMEGA's Holistic Approach to Wellness

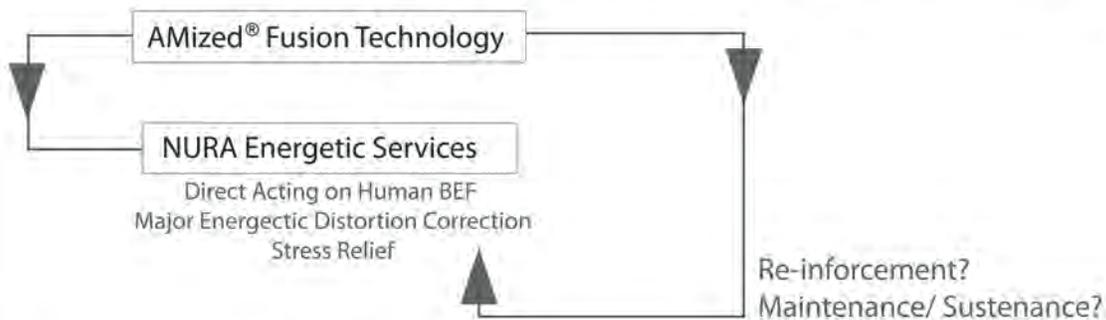

Figure 2. Amega's AFT concept. Amega's wellness mission does not stop at the invention of AMTools for continuous use. The technology has also been employed to provide wellness services and thus the creation of NURA in KL. NURA helps to aid clients who require a deeper and more intensive treatment to help them with their wellness.

An unimpaired bio-energy field can automatically access the *Zero-Point Life Force Energy* from the environment and bring all aspects (mental, emotional, physical and spiritual) into harmony.

Our body's intelligence can channel the life force energy to the points where it is needed most and, when administered over a period of time, it aids cell rejuvenation and enhances our inner vitality and immunity by cleansing, charging and rejuvenating our body cells. Thus it aids age reversal, promotes healthy cells and expels diseases.

We know the following:

- Our environment is polluted.
- Pollutants damage biomolecules, reducing our natural electronic strength and interfere with the normal interactions that we have with our environment.
- As a result, our BEF is impaired and fails to transfer information for function (**Figure 3**).

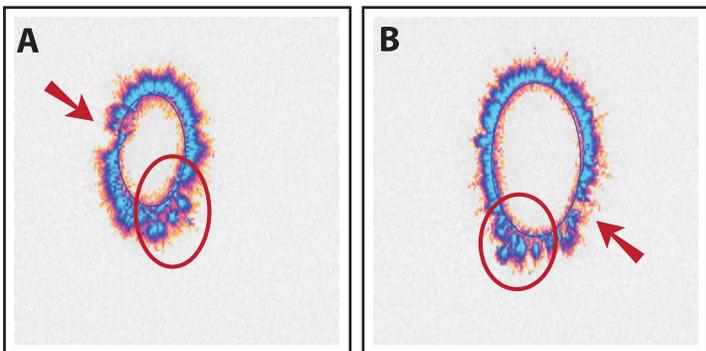

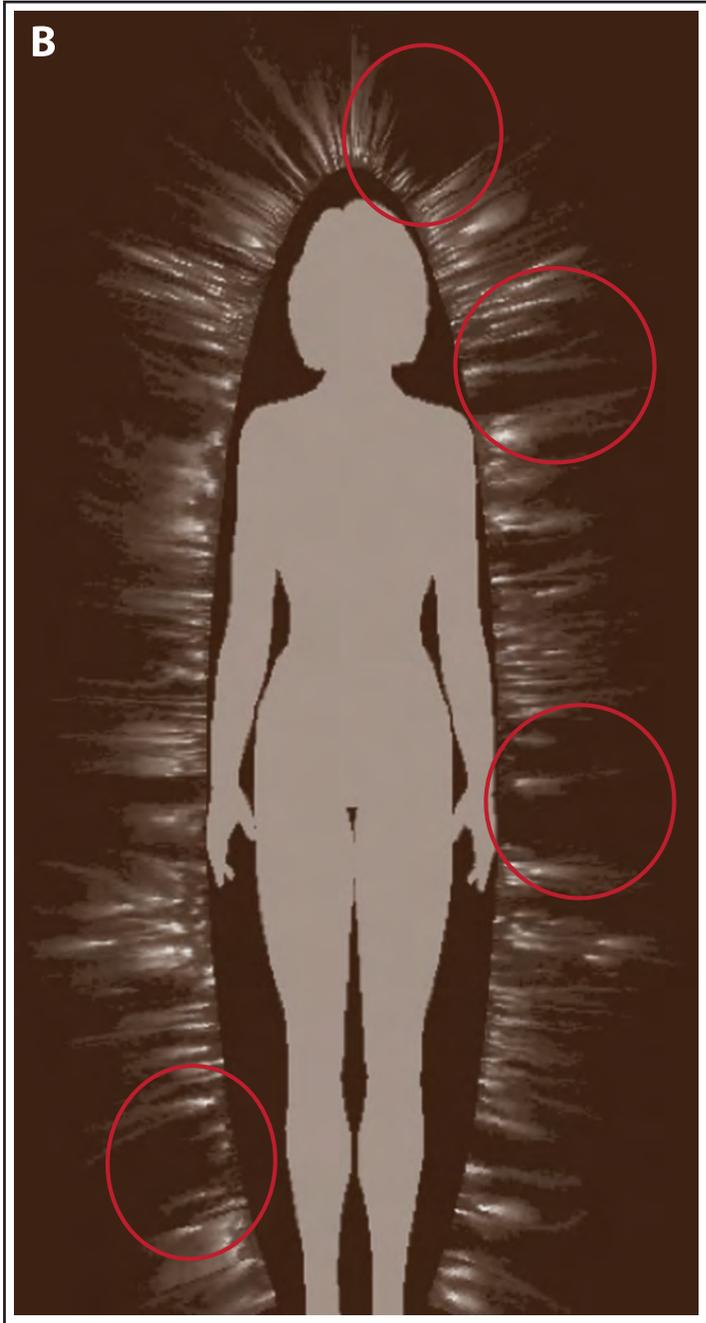

Figure 3. A & B are images taken from actual volunteers. Bio-energetic distortions (marked by red circles) and energetic gaps (marked by red arrows) usually indicate deficiency and/or a developing illness at the bio-energetic and physiological level. Energetic blocks (C) are observed sometimes in highly stressed individuals. These blocks directly correspond to compromised physical organs at the site of the blocks. [GDV-images are from Amega Global's research department].

Much of the food and liquids that we consume are highly processed and lacking in nutritional values. Their own bio-energetic fields are affected due to manufacturing processes and chemicals additives. Even treated and bottled water have lost its potential to properly mediate optimal electronic or charge exchanges.

In addition, technological advances have flooded the market with products that have strong artificial electromagnetic sources (cell phones, HD televisions, computers, etc.). These electromagnetic sources have increased propensity to distort our natural bio-rhythms. Our body now has to use more energy to maintain order, draining us of our reserve energy sources and again weakening our BEF.

Energetic distortions appear first before biological impairment and diseases manifest themselves.

At Amega, we try to restore the BEF to its optimal state or at least to its near optimal state. Why? Because an intact BEF maintains its ability to interact with higher-order informational networks as described in our earlier discussion. By keeping this interaction and information flow intact, our body's natural intelligence can channel this critical information received to the points where it is needed most and when administered over a period of time, it aids cell rejuvenation and enhances our inner vitality and immunity by cleansing, charging and rejuvenating our body cells, aiding in age reversal, promoting healthy cells and dispelling diseases.

It is difficult to eradicate environmental pollution, whether chemical or electromagnetic in nature, especially for those who live in the cities and lead executive lifestyles where technology is central to daily life. We can control the kind of food we consume however not the quality of the raw ingredients which we use. This is especially so with the massive and sometimes indiscriminate use of pesticides, chemical fertilizers and antibiotics in farming and livestock rearing.

Therefore we have come up with a technology that aids our body to keep its bio-field intact and to also use this technology to negate the distortions in the things that we consume daily, enabling us to withstand our hostile environment and stress-filled lives.

AMized[®] Fusion Technology encompasses a unique process where the resonance structure of atoms is altered. The changes are imparted at the level of sub-atomic particles: electrons, protons etc. The process mimics the mechanics of nature. In an ideal universe, these sub-atomic structures will undergo a certain routine to exhibit spin configurations, wave properties, charge density within a defined range.

During AFT processing, the unique physical forces that these atoms and molecules are subjected to mimic the natural forces that mold and shape physical matter such as organic compounds, water and natural minerals. However at Amega, with AFT, we are not only able to energetically mold and shape man-made products but to also enhance the field strength and orientation to benefit human health. AFT neutralizes negative frequencies and memories from substance and clearing the bio photon field distortions of the substance.

AFT in summary

1. Clears the distortions from the substance under treatment.
2. 'Breaks' the product down to its sub-molecular components.
3. Amplifies the resonance frequency of each component.
4. Locks in this resonance frequency.
5. Stabilizes the resulting product.

Amega's wellness products can be divided into two categories -

Direct BEF-modulating tools

- AMWand
- AMPendant

These are filled with a proprietary crystal formulation which undergoes AFT processing for a stipulated number of days. The AFT process is tailored to

1. expand and strengthen the natural resonance of the crystal formulation
2. clear energetic distortions within the crystals and to prepare it to serve as an antenna for biological tissue to find and operate at its natural resonant frequency.

We classify these tools as direct BEF-modulating as they are applied externally to the human body and directly affect energetic and informational flow around and through the body.

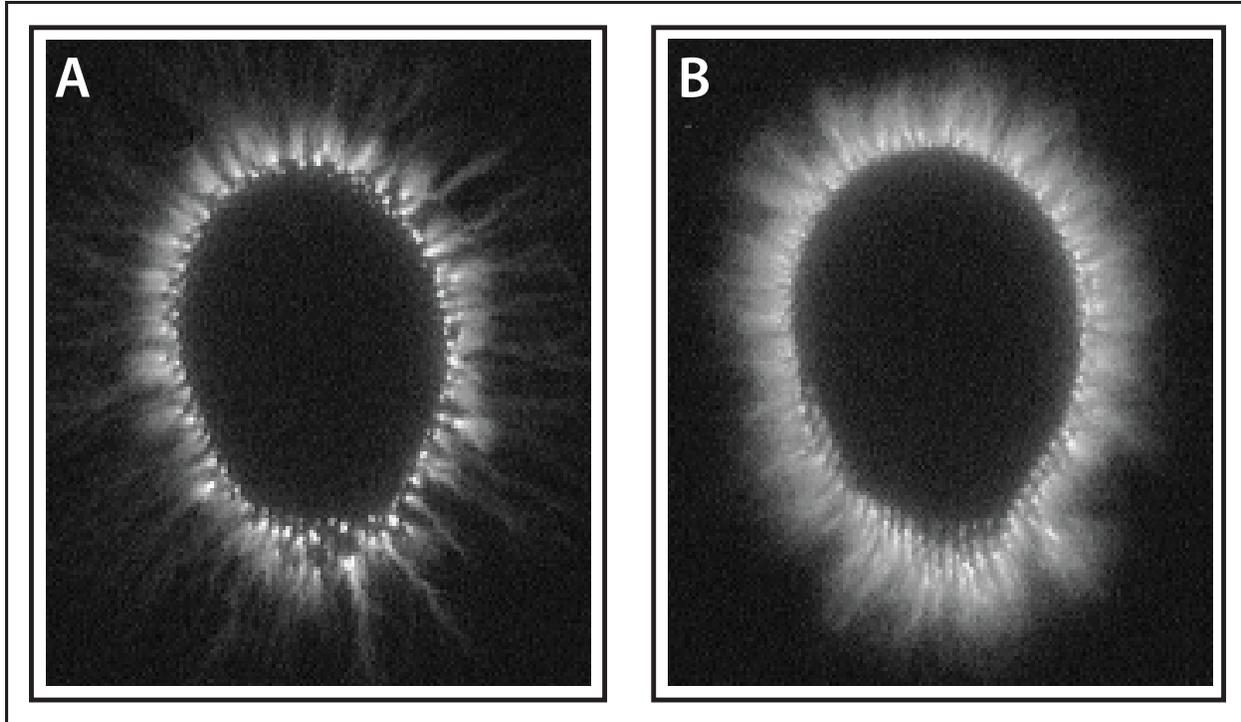

Figure 4. Image of 4th finger of left hand of subject volunteer. A. GDV-gram before AMPendant. B. GDV-gram after AMPendant was put on for 3 minutes.

Indirect BEF support consumables

- AMGenex DNA
- EGA Brine
- EGA True
- AMWater Actify
- AMGizer

The above products are classified using the words '*indirect*' and '*support*'. These consumables undergo a different set of AFT processes: the parameters of the AFT process is set to primarily clear field distortions within the ingredients of these products, including imparting an electronic charge to water (AMWater Actify). The electronic structural integrity is restored in these formulas and water.

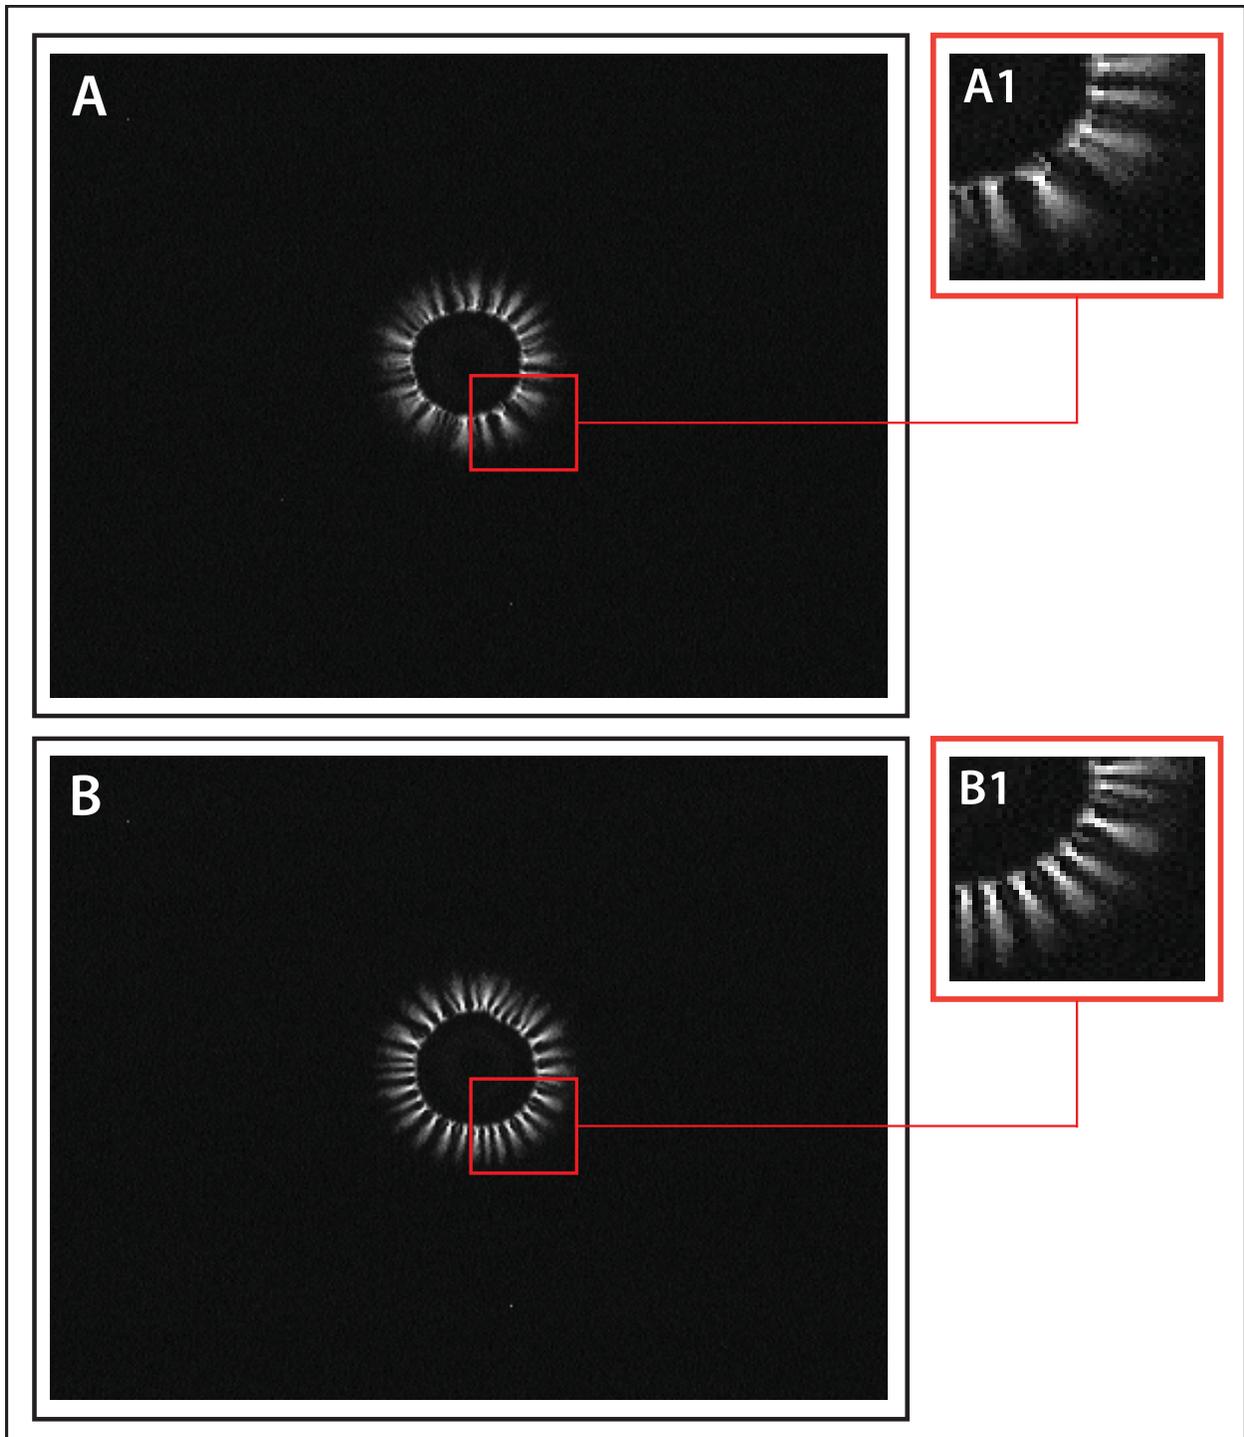

Figure 5. Water before(A) and after(B) amization. AFT changes the electrical properties of water by allowing each water molecule to re-organize its spatial orientation with other water molecules surrounding it.

In summary, AFT works by:

1. Neutralizing negative frequencies and memories from substances such as water and crystals.
2. Clearing BEF distortions of a substance or person.
3. Allows the body's physiological processes to proceed at increased efficiency.

Each of our products undergo strict quality control checks before and after processing. Furthermore each of our products are formulated uniquely, have different strengths and properties. The AFT process is uniquely devised for each product to suit specific formulations and purposes.

We do not claim to heal anyone. We are merely using modern scientific principles to help the body reach its optimal bio-energetic condition so that it can go about the business of maintaining itself efficiently.
